

THE JOURNAL OF TECHNOLOGY IN INTERNATIONAL ARBITRATION

The Journal of Technology in International Arbitration (JTIA) aims to explore all aspects of the uses of technology in international arbitration. These will range from the feasible – such as conducting some or all aspects of arbitrations remotely or online – to the futuristic (such as whether forensic technology will evolve so as to make witness testimony redundant). The JTIA will also explore rules and guidelines in development in reaction to technological advances that affect the field of international arbitration. The JTIA will largely appeal to the specialist arbitration audience, but the editors will strive to keep all submissions readable and engaging. Issues will contain material of both academic and practical interest.

SUBMISSION OF MANUSCRIPTS

The Journal of Technology in International Arbitration actively seeks articles, comments and case notes of high quality addressing current issues of technology in international arbitration. Manuscripts should be submitted to the Editor in Chief (PCohen@perkinscoie.com), accompanied by an assurance that it has not been previously published elsewhere, or an explanation as to how this submission differs from that previously published (e.g., entails an excerpt from a previous publication or includes material not previously included). Authors are requested to submit all manuscripts in a recent version of Word (doc.x preferred) by email correspondence. No hard copy is required.

SUBSCRIPTIONS

A subscription to *The Journal of Technology in International Arbitration* comprises two (2) issues per year. Subscription rates can be obtained and registration completed through Juris Publishing, at subscriptions@jurispub.com
