This is the fifth edition of the *Baker & McKenzie International Arbitration Yearbook*, an annual series established by the Firm in 2007. This collection of articles is comprised of reports on arbitration in key jurisdictions around the globe. Leading lawyers of the Firm's International Arbitration Practice Group, a division of the Firm's Global Dispute Resolution Practice Group, report on recent developments in national laws relating to arbitration and address current arbitral trends and tendencies in the jurisdictions in which they practice.

For this 2011-2012 edition, the topic of Section C of each chapter is public policy in international arbitration. Each jurisdiction reveals how public policy issues intersect with arbitration.

The aim of this *Yearbook* is to highlight the more important recent developments in international arbitration, without aspiring to be an exhaustive case reporter or a textbook on arbitration in the broad sense. It is hoped that this volume will prove a useful tool for those contemplating and using arbitration to resolve international business disputes.
