09:37 1	It is in this respect that, first, the formula is	09:41 1	As recalled again in Article 2 of the Arbitration
2	crucial; and second, I am absolutely ready to accept	2	Agreement, it was:
3	that the excess of mandate must be defined by reference	3	" to define (i.e. delimit) and demarcate the area
4	to the category of issues that the experts were charged	4	of the nine Ngok Dinka chiefdoms transferred to Kordofan
5	with deciding.	5	in 1905."
6	But even though counsel for the SPLM/A contented	6	Moreover, as Mr Born has insistently and rightly
7	itself with strong and repeated allegations that	7	noted, Article 1 of the Abyei Protocol provided
8	Article 2 "does define an excess of mandate", Article 2	8	an agreed definition of the Abyei Area. This provision
9	tells us absolutely nothing in respect to the definition	9	reads:
10	of what would be an excess of the mandate in question.	10	"The territory is defined as the area of the nine
11	Therefore the notion can only be defined on the basis of	11	Ngok Dinka chiefdoms transferred to Kordofan in 1905."
12	the Abyei Protocol and other related agreements, as well	12	But then the mandate of the ABC, or the experts
13	as precedents and/or common sense.	13	acting in lieu of them, could not have been, as Mr Born
14	As for the precedents, they are rare, and I note	14	has said repeatedly, to define the Abyei Area.
15	that all the distinctions made yesterday morning by	15	Mr President, I have been involved in international
16	Mr Born between excess of mandate on the one hand and	16	litigation for more than a quarter of a century and
17	other grounds for annulment of arbitral awards on the	17	I have lost any hope that my, say, non-Latin colleagues

2	an excess of power.  Similarly, neither the New York Convention nor the	2	the SPLM/A alleges: it was only to find the limits of
3 4	UNCITRAL Model Law, which he also mentioned, used the	3 4	the territory thus defined, that of the Ngok Dinka territory transferred to Kordofan in 1905, in accordance
5	unusual expression "excess of mandate".	5	with the wording of the formula.
6	Mr President, the context and the circumstances in	6	By the way, it was certainly not open to the experts
7	which both the mandate of the experts and that of this	7	"in defining the Abyei Area to define it in terms of
8	Tribunal were drafted and, as recorded by Mr Born	8	both territorial boundaries and land usage in defined
9	himself, very carefully drafted and repeated in five	9	territories". In all the measure that the experts did
10	different instruments, this confirms without any doubt	10	not answer that only question, they acted infra petita.
11	that the intention was to have the ABC and its experts	11	All they did in surplus, including of course
12	to comply very strictly with their mandate and this	12	defining anew the Abyei Area or the respective land
13	Tribunal to carefully check whether or not it has been	13	usages of the local tribes, was ultra petita, under
14	the case.	14	which qualification can also be included the fact that
15	We do not accept the general proposition that	15	they did not base themselves on any kind of scientific
16	"tribunals possess very broad procedural discretion",	16	analysis, as required by Article 4 of the Abyei Annex
17	but it is in the circumstances all the more acceptable	17	and paragraph 3.4 of the Terms of Reference;
18	that, first, the mandate of the experts had been	18	a requirement on which counsel for the SPLM/A has been
19	meticulously negotiated and drafted, and second, the	19	rather silent when he came to the question of

I will be brief, Mr President, with my fourth general remark, since I had already stressed in my Saturday's second speech that a careful distinction must

09:45 1	be made between the erroneous interpretation of their	09:49 1	"It is now a nearly universal principle that
2	mandate by the experts and a disagreement with them on	2	international arbitral awards must set forth the reasons
3	the way they have implemented their mandate.	3	for the Tribunal's decision."
4	The first aspect relates to the first part of your	4	I know that being counsel imposes duties, but in the
5	own mandate as announced in Article 2(a) of the	5	present case I strongly suggest that the learned author
6	Arbitration Agreement, the excess of mandate part of	6	is more convincing than the devoted counsel.
7	these proceedings; the second aspect is related to the	7	May I add, just to take another example, that
8	delimitation phase, that is to Article 2(c) of the	8	another, indeed lesser authority, in French, Daillier
9	Arbitration Agreement. But once again	9	and others, entirely concurs with the quote I just read.
10	a misinterpretation of their mandate by the experts	10	What is true for international arbitral awards in
11	necessarily results in an excess of mandate, whether	11	general is evidently even more true when boards are at
12	ultra or infra petita.	12	stake. Territorial delimitation cannot be left
13	Fifth and last general remark: the Government's	13	unmotivated, and with due respect I do not need to refer
14	complaints.	14	to a mountain of paper to make this common-sense remark.
15	The SPLM/A gloats over my apparently imprudent	15	Law is not necessarily inimical to common sense, but
16	admission according to which whether the excesses of	16	state sovereignty is certainly inimical to deciding
17	mandate the Government complains of are 10, 11 or 12	17	borders by drawing lots.
18	does not really matter. But really, Mr President, it	18	But there is another reason why climbing the
19	does not.	19	mountain of paper where Mr Born wants to take us is in
20	Does it really matter whether we sustain that the	20	any case superfluous. The experts were mandatorily
21	fact that the experts were inspired by improper	21	that is according to their express mandate instructed
22	oil-oriented motivations is an autonomous excess of	22	to base themselves on specific sources and to follow
23	mandate or part of the discussion of the illegal	23	a specific method.
24	ex aequo et bono decision? Does it really matter	24	Even accepting that they could have left their
25	whether the illegal motivation of the report constitutes	25	decision unexplained which is, I maintain, more than

	rage 9		Page 11
09:47 1	one or two or three excesses of mandate? It does not.	09:51 1	ever absurd they had to base their decision on
2	Similarly, there is no ground for counsel's	2	scientific analysis and research. Had the report
3	righteous indignation that the Government's case has	3	consisted in the final and binding decision alone, it
4	changed between the memorial and Saturday's pleading.	4	might have been more difficult for the Government to
5	It is a virtue of the adversarial principle that each	5	show that this mandatory requirement had not been
6	party is supposed to answer the other's argument.	6	fulfilled, but the excess of mandate would nonetheless
7	Moreover, as the SPLM/A had noted in its rejoinder, in	7	have been averred.
8	most respects the changes we made are more I would	8	Anyway, things being what they are, suffice it to
9	not say cosmetic, but rather formal in the hope that	9	read the report to ascertain that on crucial points it
10	our argument would be easier to follow.	10	is not based on any kind of reasoning.
11	With respect, I must add that the SPLM/A for its	11	I'm afraid it is difficult to globally share our
12	part has not at all followed our good example. Not only	12	opponents' enthusiasm for the experts' masterpiece,
13	has Mr Born in substance purely and simply repeated	13	which it holds out as, and I quote among others,
14	yesterday the argument already made by the SPLM/A's	14	"a thoughtful, impressive, well-reasoned piece of work
15	reply, but also and this is even more debatable	15	that deserves our respect".
16	far from answering the argument of our oral presentation	16	But, Mr President, as is well-known, the devil is in
17	or even our rejoinder, he has mainly limited himself to	17	the detail, and so too the excess of mandate. When
18	answering the Government's memorial.	18	I speak of detail I do not mean minor defects, but
19	Mr President, members of the Tribunal, I will now	19	a succession of serious losses of sight of the experts'
20	briefly discuss the SPLM/A's challenge to our claims	20	mandate, which was I recall it again "to define
21	concerning the substantive excesses of mandate which	21	(i.e. delimit) and demarcate the area of the nine Ngok
22	tainted the experts' report. First, the issue of the	22	Dinka chiefdoms transferred to Kordofan in 1905", based

09:53 1	simply point out in telegraphic style some of the most	09:57 1	erroneously but again, not our problem this morning,
2	untenable arguments made yesterday in respect of the two	2	it will be this afternoon well, since the experts had
3	most striking unreasoned points made by the experts,	3	recognised that the boundary was situated on the
4	points which clearly are at the very heart of the	4	Ragaba ez Zarga, there was no need, not the slightest
5	question which was before the ABC.	5	reason, no motive for researching another limit; and
6	First, contrary to what counsel for the SPLM/A said	6	second, because they do not give the slightest beginning
7	yesterday, the experts did not conclude that:	7	of an explanation for it.
8	" the Ragaba ez Zarga/Ngol rather than the	8	Mr Born says it was the southern limit of the goz.
9	River Kiir, which is now known as the Bahr el Arab, was	9	Fair enough. Then the experts' mandate was to determine
10	treated as a province boundary in practice by some of	10	the limit of the territory transferred from one province

12	They much more straightforwardly wrote:	12	analysis of tribal rights, although I have doubts
13	"The Ragaba ez Zarga/Ngol rather than the	13	whether these rights are dominant or secondary.
14	River Kiir, which is now known as the Bahr el Arab, was	14	I note in passing that Mr Born has left unanswered
15	treated as the province boundary."	15	two of the points I made at some length in this respect
16	Full stop, without "in practice by some of the	16	last Saturday. First, how can it be explained that the
17	Condominium officials".	17	experts based themselves exclusively on the Ngok Dinka's
18	Ergo the experts in effect accept that there was	18	so-called "rights", and did not treat equally those of
19	a province boundary, treated as such by the coloniser,	19	the Dinka on the one hand and the Messiriya on the other
20	and this, erroneous as it was, was a necessary and	20	hand? And second, how can the proposition that the
21	sufficient answer to the question.	21	Messiriya had secondary rights south of the shared area
22	However, the experts pushed it aside. Why? The	22	be reconciled with the so-called "equal division" of the
23	SPLM/A's explanation:	23	"shared area"?
24	"Applying this definition, the location of the	24	I accept, Mr President, that these questions might
25	putative Kordofan/Bahr el Ghazal boundary was irrelevant	25	be seen prima facie more as a disagreement with the
	Page 13		Page 15
09:55 1	to defining the Abyei Area. The decisive issue which	09:59 1	experts' finding than a ground for an excess of mandate.
2	the experts referred to as what they were doing was the	2	But these points point at an obvious excess of mandate:
3	extent of the territory of the nine Ngok Dinka chiefdoms	3	the substitution of the problematic based on the
4	as it stood in 1905, not the location of the putative	4	respective rights of the local tribes to that clearly
5	provincial boundary."	5	implied by the formula and so in conformity with the
6	It might have been irrelevant to the question of the	6	colonial approach of a territorial transfer.
7	territory of the nine Dinka chiefdoms, but it was indeed	7	Next, the ex aequo et bono issue. According to the
8	relevant to answer the question asked to the experts, or	8	other side's counsel, the Government "does not, of
9	to the ABC, which was not the question of the territory	9	course, suggest that the entire ABC report was
10	of the nine Dinka chiefdoms but that of the delimitation	10	a ex aequo et bono decision". No matter the description
11	of the territory of the nine Ngok Dinka chiefdoms	11	of the entire report; the fact is that the final
12	transferred from the province of Bahr el Ghazal to that	12	decision is exclusively a decision based on
13	of Kordofan in 1905.	13	reasonableness and fairness, mixed with a legal
14	This shift made by the experts from one question	14	principle dictating recourse to "the equitable division
15	corresponding to the mandate of the experts, and to	15	of shared secondary rights".
16	which they acknowledged that they had the answer, to	16	No matter what comes first and what is the
17	another question to which they had to invent an entirely	17	respective weight or one or another justification, the
18	new, artificial answer, is not a substantive error. It	18	fact is that: first, the decision is not based on
19	is by all means an excess of mandate.	19	a scientific analysis of documents, and could not be,
20	The Government is simply not in disagreement with	20	since the result of the scientific analysis, the
21	the substance of the experts' finding; it notes that	21	Ragaba ez Zarga, had been deliberately ruled out without
22	their finding is outside their mandate.	22	giving any reason; and second, with all due respect for
23	The same holds true concerning the 10°10′ north	23	the experts' knowledge in African or even maybe more
24	parallel, for two reasons: first because since, as	24	precisely Sudanese traditional legal principles, the
25	I have just said, the experts had recognised	25	1905 transfer was obviously not made on the basis of
	D. 14		D. 16

,			
10:02 1	these principles but according to the purely territorial	10:06 1	in the report at page 4, and read by Mr Born, reads as
2	logic of the coloniser. Once again the ABC's mandate	2	follows I read it in my turn:
3	was the transfer or, more precisely, the result thereof.	3	" to determine as accurately as possible the area
4	Last on this aspect of the excess of mandate, the	4	of the nine Ngok Dinka chiefdoms as it was in 1905."
5	oil ulterior motive.	5	Still this was simply not the mandate, and surely
6	Is it the case, Mr President, that we have not had	6	the experts cannot simply have ignored a key phrase in
7	the "courage to make an impartiality challenge"? We	7	their substantive mandate, the phrase "transferred to
8	think that the decision is motivated by this dominant	8	Kordofan", and they cannot be held to have complied with
9	consideration.	9	their mandate or not exceeded it if they have just
10	Let me just say, Mr President, that of course this	10	swallowed this phrase.
11	is not the kind of thing arbitrators or commissioners	11	Again, in spite of our opponent's mantra in this
12	would readily and explicitly recognise. Always think of	12	case, this is not a disagreement by the Government on
13	it; never speak of it. Interesting the oil issue is	13	the definition of the Abyei Area, which is already given
14	mentioned as early as page 1, paragraph 6, of the	14	in Article 1.1.2 of the Abyei Protocol; it is a strong
15	SPLM/A's rejoinder.	15	and categorical disagreement of the Government with the
16	But when one considers together the absence of	16	experts on the interpretation of their mandate, which is
17	jurisdiction for the line arrived at with this aspect of	17	defined in Article 5.1 of the Abyei Protocol and
18	the case, there is ground for perplexity as to the real	18	reiterated in Article 1 of the Abyei Annex, in
19	motives of the experts' position. In this respect we	19	Articles 1.1 and 1.2 of the Terms of Reference and in
20	deemed it appropriate to mention this troubling	20	Rules of Procedure Nos. 1.1 and 1.2. But this has not
21	circumstance, together with the non-motivation of the	21	discouraged them to redefine this agreed and repeated

23	I now come to the extra petita decisions.	23	Since the SPLM/A has advanced no new argument on the
24	To end this part of our rebuttal, some quick remarks	24	other aspects of our infra petita complaint and
25	on what could be called the extra petita decisions made	25	indeed virtually no argument at all I can deal

3	they do not answer the question asked to the ABC, in	3	But let me reiterate for the sake of clarity,
4	which case the decisions are infra petita. But in both	4	Mr President, that, first, this is not a minor issue,

6	Just five minutes before the end of his lengthy	6	case, the ultra petita problem; and second, nevertheless
7	presentation Mr Born made an interesting and most	7	if, as we confidently think, the Tribunal recognises
8	revealing lapsus linguae, I suppose this is what it was.	8	that by deciding on the respective grazing rights of the
9	He had to admit that having artificially decided the	9	Ngok Dinka on the one hand and the Messiriya on the

Not having given a witness statement, it would have been entirely inappropriate for the agent to speak as a witness other than from the dossier on these issues.  As an alternative, the Government, acting on advice, submitted testimony from one of the three members of the presidency, the Vice President of Sudan, Mr Ali Osman Mohamed Taha. If anyone should have been aware of when the final presentation of the ABC report was to take place, it would have been one of the three individuals to whom that presentation was to be made.  I note that although we made the vice president available for cross-examination by video-link,	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	" had never spoken about nor anticipated any experts' decision on the boundary. They never told us that this final report was ready the way they told General Sumbeiywo three days later."  Mr Zakaria Atem reveals that none of the Government of Sudan ABC members were "informed of the ABC experts' conclusions, or of the fact that they were going to present a final report to the presidency."  Mr Abdul Rasul El-Nour Ismail clearly states that:  "This meeting was not agreed to before by the ABC as an ABC meeting. They never briefed nor consulted the ABC members on what they wanted to say to the presidency."  All these witnesses have been presented by the Government in this arbitration. The [SPLM/A] has indicated that they will question only Mr Zakaria, and only in the delimitation phase. His witness statement contains material relevant to delimitation. They called no one for cross-examination on excess of mandate.  Finally I should note that from the private correspondence between the ABC experts and IGAD personnel, which is now in the record, correspondence to which the SPLM/A has apparently had access, it is Mrs Keiru's email of 7th May 2005 which is relied on to
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	this point. But the suggestion that a decision was taken that the agent not give evidence so as to shield him from cross-examination on a point on which he is not telling the truth impugns my credit as well as his. The issue concerns me and not Ms Malintoppi, whose name counsel for the SPLM/A apparently cannot pronounce; he didn't mention it once yesterday.  Mr President, prudently it is not the practice for the agent of a state to give written or oral evidence.  This is for good reason, given the Nuclear Tests principle and the agent's authority to speak for the state in the matter of the dispute. Not having given a witness statement, it would have been entirely inappropriate for the agent to speak as a witness other than from the dossier on these issues.  As an alternative, the Government, acting on advice, submitted testimony from one of the three members of the presidency, the Vice President of Sudan,  Mr Ali Osman Mohamed Taha. We saw yesterday that Article 4 of the Abyei Annex granted the experts broad, independent investigatory power to consult both the British archives and other relevant sources on Sudan wherever they may be located.  We saw also how that provision very comfortably covered both the interviews of Professor Cunnison and Mr Tibbs, as well as the interviews that occurred in Khartoum, the consideration of the Millington email, and such other investigatory actions that the experts might have taken or wished to have taken.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	that had been agreed by the parties, this phrase, far from suggesting some sort of procedural second-guessing of what the experts did or some sort of opportunity to appeal the report, to challenge its final and binding basis on procedural grounds, actually does exactly the opposite, if one were to read it as some kind of condition on the report.  The only procedural reference that it makes is to the ABC Rules of Procedure, which it was for the experts to determine, and does not refer to the Abyei Annex or the other provisions.  So I would suggest that the notion that the parties, in inserting this phrase into the second sentence of Article 5, meant to provide for some sort of procedural review is as far from the view as could be the case.  We also know that from the other provision that the parties entered into, which you can also see on the slide, in Article 5.3, which said that the report would be put into immediate effect. That meaning is also confirmed by the testimony of those involved in drafting the parties' agreements and, as we've just seen, the interpretation that the ABC experts repeatedly expressed without objection from the parties during the ABC proceedings. JUDGE SCHWEBEL: Mr President, this is a question for counsel of both parties to comment on, if they wish.  Counsel of the Government of Sudan have challenged the failure of the experts to submit the final report to the whole Commission before presenting the final report to the presidency. The Commission, as has been pointed out just now and earlier, was composed of the experts and party-appointed representatives, five of whom were partisans of the position of the Government of Sudan and five of the SPLM respectively.  If the experts had submitted their final report to the Commission, it would in effect have given the parties advance notice of the content of the final report to be presented to the presidency. In those circumstances, would so doing have risked the possibility of a presentation to the president ever taking place?  THE CHAIRMAN: I give you the floor, Mr Born, but I give also a possibility to the other side to answer.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	experts will have the final say."  I would emphasise in this regard that this Article 14 that we're discussing was a rule that the ABC experts themselves drafted. They knew what was intended by that provision. They implemented that provision very faithfully. The idea that had they presented the report to the parties everything would have gone smoothly is inaccurate. One doesn't know what would have happened.  In fact, the impartial experts had had the final say, and they as the parties' provisions provided presented that to the president. That was what was intended, and that was what happened.  THE CHAIRMAN: Does the Government want to answer the question of Judge Schwebel?  MR BUNDY: Yes, thank you Mr President, Judge Schwebel.  I think all of this is complete speculation. How on earth can we know about something that didn't in fact happen? What we do know is the sequence in which the procedural rules spelt out what was going to happen.  As Ms Malintoppi explained earlier this morning, there was a difference between the parties presenting their final submissions; the experts then evaluating all the material presumably including the submissions;

So here again confusion is being introduced not so much by the mapping as by the poor analysis of that mapping by the SPLM/A.  In paragraph 63 of the appendix there is yet further evidence of an unfamiliarity with the subject. The text is now on screen:  "The [Government] relies on a 1916 map of Darfur prepared by the Geographical Section of the War Office. The Government fails to mention, however, that this map also shows the boundary between Kordofan and Bahr el Ghazal as running north of the Kiir/Bahr el Arab until approximately 24°30' east longitude, then swinging south to run beneath the Bahr el Arab and then arch northwest to the Darfur frontier."
4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	near Lake Ambady."  There has been a complete misinterpretation of the map in respect of Lake Ambady. If we look at an extract of the actual map in more detail, we can see that Lake No carries traces of a coloured infill which is more obvious on Lake Rudolf much further to the south. On the second, larger-scale extract, the infill for Lake No is more easily seen.  By contrast, the double channels south of the Bahr el Arab confluence can be seen to have no such infill. They are merely the double channels close to Ghabat el Arab referred to in my opening remarks. One can only assume that the SPLM/A has taken these channels to be the outline of Lake Ambady, a careless and inexperienced interpretation.  At paragraph 58 of the appendix there is another example of confused analysis. 25 Q. So you have made a latitudinal adjustment as well as

- 16:07 1 records that might refer to the boundaries of Kordofan
  - 2 and Bahr el Ghazal. These records were brought to me
  - 3 and nothing particularly useful was found as far as
  - 4 Kordofan and Bahr el Ghazal go. In fact, nothing was
  - 5 found.
  - 6 Q. Okay. In your second report you refer to a Cunningham
  - 7 route sketch -- there's no need to go to it -- which you
  - 8 reproduce at figures 1 and 2 of your second report.
  - 9 A. Yes.
  - 10 Q. Did you see any of the other route sketch maps that are
  - 11 relied on by the Government in its submissions in these
  - 12 proceedings?
  - 13 A. Not during my visit.
  - 14 Q. Did you see the Wilkinson map in particular subsequent
  - 15 to your visit?
  - 16 A. Did I see -- which Wilkinson map?
  - 17 Q. The 1902 Wilkinson sketch map.
  - 18 A. The route map?
  - 19 Q. Yes.
  - 20 A. Did I see it subsequent to my visit?
  - 21 Q. Yes?
  - 22 A. Yes.
  - 23 Q. Did you ever ask to see the complete Wilkinson route
  - 24 sketch map?
  - 25 A. I personally did not.

- 16:10 1 Percival -- I believe I have seen the Percival complete
  - sketch map, but I've not used it in my report.
  - 3 Q. The complete Percival sketch map that you believe you
  - have seen, is that in the same form as the first
  - 5 Percival sketch map that you saw that related to the
  - segment of his trek from Wau to Kiir?
  - A. Kiir to Wau.
  - Q. Kiir to Wau, you are quite right.
  - A. Is it in the same form? In what -- how --
  - 10 Q. Is it produced with the same pen, the same writing, the
  - same format, or is it a rough sketch?
  - 12 A. I have to say that there are a lot of Percival sketches.
  - I can recall a version of Percival's sketch south of the 13
  - 14 Kiir which in my view was a fair drawn copy, though by
  - 15 whom I don't know.
  - 16 Q. Did you see what would be in your view a fair drawn copy
  - of a sketch map by Percival for the section of his trek 17
  - 18 from Keilak to the Kiir?
  - 19 A. I think I ought to make clear, Mr President, what I mean
  - 20 by a "fair drawn copy".
  - 21 I imagine that Percival on his day-to-day journey
  - 22 drew a rough sketch and then, perhaps when he got to Wau
  - 23 or perhaps when he stopped for a few days on the route,
  - 24 he would draw up a neater version. That you could say
  - 25 was fair drawn.

Page 143

- 16:09 1 Q. Okay. Did you see the Percival route sketch map
  - relating to his route from the Kiir to Wau?
  - 3 A. Yes.
  - Q. Excuse me. Did you see his sketch map for the route 4
  - 5 from Lake Keilak to Wau?
  - 6 PROFESSOR CRAWFORD: Sorry, one point of clarification.
  - 7 Are you saying did he subsequent to his visit or did
  - 8 he during his visit?
  - 9 MS MILES: He's already said he didn't see any sketch maps
  - 10 during his visit, so subsequent. Thank you for
  - 11 clarifying.
  - 12 A. In writing my reports I only saw the Percival sketch
  - maps running south of the Bahr el Arab, or Kiir, as 13
  - 14 Percival referred to it.
  - 15 Q. Did you ever ask to see the complete Percival sketch
  - 16
  - 17 A. I very much wanted to see that part of the route between
  - the Ragaba ez Zarga and what we now take to be the 18
  - 19 Bahr el Arab.
  - 20 Q. So did you ever ask to see the complete Percival sketch
  - 21
  - 22 A. I asked members of our team in England, and I believe
  - that request was conveyed to Ambassador Dirdeiry.
  - 24 Q. But you never did see the complete Percival sketch map?
  - 25 A. I have -- since completing my reports I have seen the

- 16:12 1 But when I say that I've seen a fair drawn map
  - 2 running south from the Kiir, I'm thinking more -- it
  - 3 looked to me to be a more professionally drawn map, and
  - 4 I had the feeling that maybe a cartographer had done
  - 5 that, though I can't in any way prove that.
  - 6 To turn now to the Keilak maps, I believe that
  - 7 I have seen rough maps of the Keilak to Ragaba ez Zarga
  - 8 and also a fair drawn map probably by Percival.
  - 9 Q. So just to be clear, you believe you have seen from the
  - 10 Government a fair drawn map for the segment from Kiir to
  - Lake Keilak, probably drawn by Percival?
  - 11
  - 12 A. No, I'm not saying that.
  - Q. You have not seen?
  - A. You are confusing me by changing direction --
  - 15 Q. I'm sorry.
  - 16 A. -- and also changing segments. I don't want you to get
  - 17 the impression that I've seen anything other than
  - 18 a route from Keilak to the vicinity of the
  - 19 Ragaba ez Zarga. I believe -- I cannot be absolutely
  - 20 sure, but I believe I have seen a rough sketch of that
  - 21 route, and a fair drawn section of that route by
  - 22
  - 23 I have not seen, to my knowledge -- certainly not
  - 24 before I wrote my reports -- any sketch between the
  - 25 Ragaba ez Zarga and Burakol close to the Bahr el Arab.

Page 144

Day 3

- 16:14 1 South of Burakol I believe I may have seen Percival's sketch, I believe I may have seen a rough sketch, and
  - 3 I have certainly seen a sketch I took to be fair drawn
  - 4 by a cartographer, in preparation presumably for
  - 5 transfer to the next edition of the 1:250,000 map.
  - 6 It's a very complicated set of sketches, and
  - 7 I apologise if I'm being a little bit confused, but it's
  - 8 requiring quite an effort of memory to sort it all out
  - 9 without any documents in front of me.
  - 10 Q. I think you were very clear, thank you, Mr MacDonald.
  - 11 Just one question about your answer. You said:
  - 12 "I have not seen to my knowledge, certainly not
  - 13 before I wrote the report, the sketch between the
  - 14 Ragaba ez Zarga and Burakol."
  - Now, have you seen one since you wrote your report,
  - or indeed your reports?
  - 17 A. I'm sorry, Mr President, but I really can't answer that
  - question, not because I'm trying to avoid it, but
  - 19 because quite honestly I was not involved with the
  - sketches after writing my report because they were then
  - 21 being used for another purpose which was not my role in
  - the case.
  - And so, while I may have seen them, I have not
  - 24 particularly registered them because I had nothing --
  - 25 I had no reason to look at them with care and put them

Page 145

- 16:18 1 Q. And you did not review any Bahr el Ghazal boundary file
  - 2 at that time, did you?
  - 3 A. No. No.
  - 4 Q. Did you ask for a Kordofan boundary file to review?
  - 5 A. Yes
  - 6 Q. Did you ask for a Bahr el Ghazal boundary file to
  - 7 review?
  - 8 A. Yes.
  - 9 Q. Okay. We can move on to the content of your reports
  - 10 now, if we may. Can I please have back my pages in case
  - 11 I need them?
  - 12 A. Yes. (Handed)
  - 13 Q. Thank you.
  - 14 If we start with your most recent, third, report,
  - 15 you accept there that the area we're concerned about in
  - the era under consideration was a remote part of Africa.
  - 17 You describe it that way at paragraph 61 of your third
  - 18 report, but you probably don't need to go to it to agree
  - 19 with me that this was a remote part of Africa?
  - 20 A. I would have thought so.
  - Q. And that indeed there were -- and again you probably
  - don't need to go to the quote to agree with me -- but
  - 23 there were difficulties facing any mapping of that area
  - 24 in Africa?
  - 25 A. I do agree with that.

Page 147

- 16:16 1 in my memory.
  - 2 I hope -- I'm not trying to avoid the question, but
  - 3 really it is quite difficult. There were a flood of
  - 4 reports coming in, and these really did not concern me
  - 5 in the later stages.
  - 6 Q. We can move on, Mr MacDonald.
  - Also at your second report, appendix 2, on the very
  - 8 last page of your second report.
  - 9 A. I need another copy because --
  - 10 Q. That's okay, I can pass you my copy. Here you are.
  - 11 (Handed)
  - 12 A. Yes.
  - 13 Q. At appendix 2 you refer to three sources. This is back
  - 14 at your visit to the Survey Department archives. You
  - refer to three sources: the Kasala boundary file, the
  - Sinnar boundary file, and the Funj boundary file, and
  - 17 you speak in appendix 2 about having reviewed some
  - 18 correspondence -- would you like the other page of
  - 19 appendix 2?
  - 20 A. No, I've got the other page.
  - 21 Q. Oh, you've got it now -- about having reviewed some
  - 22 correspondence from those files.
  - 23 My question is: you did not review any Kordofan
  - boundary file at that time, did you?
  - 25 A. No.

Page 146

- 16:19 1 Q. And also that many of the early administrative
  - 2 officers -- and you referred to this in your
  - 3 presentation -- carrying out exploration were not
  - 4 experienced surveyors? You put it this way:
  - 5 "At the time it would have been possible to
  - 6 determine astronomically [this is coordinates], but this
  - 7 would be beyond the expertise of most of the
  - 8 administrative officers concerned."
  - That's true, isn't it?
  - 10 A. Yes. I have to say that of course this is all
  - speculation. I'm attributing to these officers a level
  - of ability, and of course that is on the best grounds of
  - 13 probability.
  - 14 Q. That's fine. You say that:
  - 15 "Any travel in the country between the
  - Bahr el Ghazal and the watershed was difficult."
  - By "the Bahr el Ghazal", you mean the Bahr el Ghazal
  - 18 River, don't you?
  - 19 A. Yes, I do.
  - 20 Q. And by "the watershed" you're referring to the
  - 21 Lake Chad/Nile watershed?
  - 22 A. Yes, I do. Yes, I am.
  - 23 Q. So the whole area that you talk about when you refer to
  - the country between the Bahr el Ghazal and the watershed
  - is in fact that whole area to the -- without a map, it's

16:20 1 difficult.

- 2 A. Yes.
- 3 Q. Could we go to your Comyn map, which is reproduced at
- 4 page 182 of your first report.
- 5 A. Yes.
- 6 Q. It's cut off at the side, which makes this a little bit
- 7 difficult, but I think you'll follow. At the locator
- 8 inset we see Lake Chad to the northwest; correct?
- 9 A Yes
- 10 Q. And the area enlarged is essentially to the area of the
- 11 east and southeast of that Lake Chad/Nile watershed
- 12 therefore?
- 13 A. Yes.
- 14 Q. So that's the area that you're discussing when you're
- 15 talking about where travel was difficult: essentially
- the area on the Comyn map?
- 17 A. Well, I'll just make the comment that it's really part
- of that area, because you can see with the lines, for
- 19 instance, from Meshra el Rek to Wau, Wau to Daim Zubeir,
- these are all, if you look at the legend, country
- 21 traversing maps by British officers.
- It's a fairly dense little network of routes there,
- and it's probably the area to the north of the vignetted
- line that runs through the centre of Bahr el Ghazal.
- 25 Q. And "the area to the north of the vignetted line", by

Page 149

- 16:24 1 A. Yes. Well, I wrote it, so obviously I believe it to be
  - 2 true
  - 3 Q. I'm sure. You recognise that the task of sorting out
  - 4 the course of the waterways in the area proved very
  - 5 challenging in what you describe as "very difficult flat
  - 6 country"; that's 5.2 of your first report, if you want
  - 7 to check that.
  - 8 A. Yes.
  - 9 Q. In your third report you elaborate on the relevance of
  - 10 the problem that you describe as the "flatlands of the
  - 11 Bahr", and you elaborate by saying:
  - 12 "The traveller was unable to get any view of the
  - ground to trace the twists and turns of the rivers and
  - the way they were interwoven."
  - 15 Is that correct?
  - 16 A. Yes.
  - 17 Q. You agree, moreover, that it is unreasonable to expect
  - a detailed depiction of these river courses until the
  - 19 arrival of aerial photography?
  - 20 A. Yes, I said that this morning.
  - Q. And this, in the Sudan at least, would not have been
  - 22 until the Second World War?
  - 23 A. Yes.
  - 24 Q. In these proceedings we are fortunate enough to have the
  - 25 benefit of modern satellite imagery of the area, and

Page 151

- 16:22 1 that you mean the area to the north --
  - 2 A. Perhaps "shaded line" would be --
  - 3 Q. -- of the shaded line, so that would encompass the area
  - 4 above the Ngol and above the Bahr el Arab?
  - 5 A. Again, that's a fairly general statement. I think
  - 6 coming down to that place, Shakka, and moving into the
  - 7 watershed area I think was a fairly general route
  - 8 followed by traders and slavers.
  - 9 Q. But the area north of the Bahr el Arab as depicted on
  - 10 this map?
  - 11 A. Immediately north of the Bahr el Arab, yes.
  - 12 Q. Okay. So you accept that the fairly dense network of
  - 13 routes that you describe are not in the area north of
  - the Bahr el Arab?
  - 15 A. No, but of course Comyn was based in the south, and he
  - shows the ones he knows about. There are clearly other
  - 17 routes coming down from the north that he doesn't show.
  - 18 Q. Okay, and we'll come to those.
  - 19 You say of this area, in your first report, that by
  - the end of the 19th century it had not been possible to
  - 21 connect the rivers on the watershed with the known
  - 22 mouths of tributaries on the Bahr el Ghazal with any
  - 23 certainty.
  - 24 A. Can you give me the reference?
  - 25 Q. Yes, certainly: paragraph 5.1 of your first report.

Page 150

- 16:25 1 I think you agree that the actual satellite imagery
  - 2 shows that this is an area where there is a multitude of
  - 3 channels, old and new?
  - 4 A. Yes.
  - 5 Q. Now, if we could look at the 1904 War Office map,
  - 6 please, Mr MacDonald.
  - 7 If it doesn't raise any objection, could I ask
  - 8 Mr MacDonald to turn to that map in the Gleichen
  - 9 handbook?
  - 10 Mr MacDonald, do you recognise the book I just
  - 11 handed to you? (Pause). I can assist you: it's the
  - 12 Gleichen handbook --
  - 13 A. Yes. I hadn't seen it in its original edition.
  - 14 Q. If you turn to the back please, Mr MacDonald, I'd like
  - you, just if you can, by looking at the reference
  - number, confirm that that is the map that's on the
  - 17 screen?
  - 18 A. Yes, yes, it is.
  - 19 Q. You refer to this map in your first report, describing
  - it as having been produced by the Intelligence Office in
  - 21 Khartoum in May 1904.
  - 22 A. I certainly accept the 1904. I'd have to take your word
  - for May without looking up the reference.
  - 24 Q. It's the first report at paragraph 3.9. You can check
  - it, I'm happy for you to go to it. You'll find that at

16:27	1	page 172.
10.47		Dage 172.

- 2 A. Yes, that's correct.
- 3 Q. And you agree, and you've said in your presentation,
- 4 that this map reflects Wilkinson's assumption that the
- 5 river he reached just south of Falwal was what he called
- 6 the Bahr el Arab?
- 7 A. Yes.
- 8 Q. In your second report at paragraph 10 you say that:
- 9 "There was a short-lived period of confusion after
- Wilkinson's journey in 1902 which resulted in one map
- being issued with a distortion in the course of the
- 12 Bahr el Arab to the north of Sultan Rob's village."
- 13 A. Yes.
- 14 Q. That map you're referring to is the map on the screen
- and the map that you just found in the back of the
- 16 handbook?
- 17 A. Yes.
- 18 Q. And you say that this confusion had been corrected, to
- 19 be fair, by 1907?
- 20 A. Yes.
- 21 Q. So Wilkinson's mistake was at least initially accepted
- by the Condominium administration?
- 23 A. I only know that Wilkinson's mistake resulted in the
- depiction on the 1904 map.
- 25 Q. Okay. If you go to paragraph 3.9 of your first report,

- 16:31 1 What you're looking at here is the last page of the
  - 2 bibliography and cartography for the 1905 Sudan
  - 3 handbook; right?
  - 4 A. Yes
  - 5 Q. If we look at part C of the cartography, that's entitled
  - 6 "Maps", obviously. Can you see under the words "For
  - 7 general maps the following are recommended", the first
  - 8 map listed there, would you agree with me that that is
  - 9 the map that you've just refolded in the back of the
  - 10 handbook?
  - 11 A. Yes, I would.
  - 12 Q. Could you read out for me, please, the words after the
  - 13 name of that map, the words in parentheses?
  - 14 A. It says "latest and most up-to-date general map", which
  - of course refers to the Anglo-Egyptian Sudan.
  - 16 Q. Thank you.
  - 17 If we could move to a different topic now please,
  - 18 Mr MacDonald: the broader subject of what you describe
  - in your first report as "Intense Exploration, 1900 to
  - 20 1910". You open that section of your report at page 168
  - 21 with a quote from 1898, the first year of the
  - 22 Condominium. The quote says -- these are not your
  - 23 words:
  - "Almost a century has passed since Browne first
  - 25 marked the Bahr el Arab on the map, and our knowledge of

## Page 155

- 16:29 1 Mr MacDonald, the third sentence of that report, you
  - 2 sav:
  - 3 "Initially it was accepted by the Condominium
  - 4 administration that he ['he' being Wilkinson] was right
  - 5 in calling this stream the Bahr el Arab."
  - 6~ A. Yes, I have written that, and perhaps I should more --
  - 7 I should have written what I've just said.
  - 8 Q. Looking at the map, Mr MacDonald, and you can look at
  - 9 it, it has a close-up on the screen, can you see
  - 10 Sultan Rob's marked on that map?
  - 11 A. I can.
  - 12 Q. Can you tell me on this map the name of the river that
  - 13 Sultan Rob's is located on?
  - 14 A. It says River Kiir or el Gurf.
  - 15 Q. Can you describe for me whether on this map Sultan Rob's
  - is depicted on the north or the south of that river?
  - 17 A. I'd need a greater enlargement for my old eyes, I'm
  - 18 afraid.
  - 19 Q. It may help to look at the map in the back of the book.
  - We do have a magnifying glass. I'm not being cheeky;
  - 21 I can't see it either.
  - 22 A. Yes, it appears here to be on the northern side.
  - 23 Q. Could you fold up that map but keep open Gleichen, the
  - 24 handbook, for a moment. Turn from the back to page 349,
  - 25 please, of that handbook. Do you have it?

Page 154

- 16:32 1 it is even now scarcely more definite. No European has 2 explored the whole course of the stream."
  - 3 You've reproduced that quote in your report.
  - 4 A. Yes
  - 5 Q. Now, in that section of your report entitled "Intense
  - 6 Exploration, 1900 to 1910", the first pre-1905 explorer
  - 7 that you refer to is Saunders; right?
  - 8 A. Yes
  - 9 Q. However, you would accept that Saunders made little
  - 10 contribution to the understanding of the course of the
  - Bahr el Arab, other than defining the location of its
  - mouth?
  - 13 A. Yes
  - 14 Q. The next pre-1905 explorer that you refer to in your
  - 15 "Intense Exploration" section is Wilkinson?
  - 16 A. Yes.

19

- 17 Q. We've spoken about Wilkinson briefly.
- The third and final pre-1905 explorer to the region
  - that you discuss in your first report, albeit briefly,
- 20 is Percival. (Pause)
- 21 A. I'm just pausing because I'm not sure that it was the
- 22 final. I would have thought I mentioned Comyn and
- 23 Bayldon.
- 24 Q. Sorry, Mr MacDonald, pre-1905. I'm cutting your
- "Intense Exploration" section down the middle.

16:34 1	A.	Sorry, 1	missed that.	Yes, I	think that's correct,
---------	----	----------	--------------	--------	-----------------------

- 2 provided you mean, by "1905", January 1905?
- 3 Q. Yes. Other than Percival and Wilkinson, in your section
- 4 in your first report on intense exploration you don't
- 5 discuss any other pre-1905 sketch maps or trek reports
- 6 from any other explorers in the region?
- 7 A. No.
- 8 Q. So the extent of intense exploration pre-1905 discussed
- 9 in your first report is limited to Wilkinson and
- 10 Percival?
- 11 A. And Saunders.
- 12 Q. But you've said that Saunders made little contribution
- to the understanding of the course of the Bahr el Arab,
- 14 other than defining the location of its mouth.
- 15 A. That was a contribution.
- 16 Q. Alright, that's fine. Could we turn to another topic.
- 17 THE CHAIRMAN: I'm sorry, how long do you think you have
- 18 to go on?
- 19 MS MILES: 10 minutes.
- 20 THE CHAIRMAN: Okay, keep going.
- 21 MS MILES: Ngok presence, Mr MacDonald. Let's turn to the
- 22 historic and cartographic evidence dealing with the
- presence of Ngok in and around 1905.
- Now, apart from passing reference to Wilkinson and
- 25 others having seen Sultan Rob's village, later his old

- 16:37 1 A. Yes, I do.
  - 2 O. And indeed, settlements of Sultan Rob were at that time
  - 3 located to the north of the River Kiir?
  - 4 A. That is what Wilkinson said.
  - 5 Q. If we could look at the Wilkinson sketch map, those
  - 6 marked settlements, the Mareig district is marked north
  - 7 of the Kiir. You accept that these are likely
  - 8 settlements of Sultan Rob that Wilkinson came to before
  - 9 he crossed the Kiir?
  - 10 A. I think I should make it clear, Mr President, that my
  - job was to identify or to chronicle the development of
  - the depiction of the Bahr el Arab. I was not
  - particularly concerned with where the Dinka were living.
  - 14 Q. But you did deal with where the Dinka were living in
  - 15 your second report, albeit briefly, at least in relation
  - to this area and in relation to where Sultan Rob was
  - 17 living?
  - 18 A. I did deal -- yes, I dealt with the issue of whether
  - 19 Sultan Rob lived on the north or south bank, because
  - I felt that Sultan Rob is a major feature on the maps of
  - 21 the era, and I wanted to be quite clear where he was.
  - 22 Q. On that subject, at paragraph 25 of your second report,
  - 23 you say that:
  - "There is no evidence that Sultan Rob had moved from
  - 25 his original village in 1903."

## Page 159

- 16:35 1 village and Burakol, you did not discuss the presence of
  - 2 Ngok prior to the 1905 transfer in your first report?
  - 3 A. No.
  - 4 Q. Also in your third report you do not consider Ngok
  - 5 presence in any detail, and to be fair, that was
  - 6 a responsive report to the response to your first
  - 7 report.
  - 8 A. Yes.

12

- 9 Q. So for the questions on your discussion of Ngok
- presence, could we turn to your second report, as this
- is the report in which you deal with any of the evidence
  - on this subject.
- Now, first at paragraph 23 of your second report,
- 14 you deal with paragraph 924 of the SPLM/A memorial. And
- 15 that paragraph of the SPLM/A memorial says -- and
- 16 I quote from the SPLM/A memorial:
- 17 "Wilkinson next records that, at a point 28 miles
- 18 from Ngol, he reached what he termed 'the Kiir River, or
- 19 Bahr el Jange', and the 'settlements of Sultan Rob',
- which were located on both sides of the river."
- Now, your comment about that report is that the
- 22 citation is not true to its source. You would agree
- with me though that the extracted quote, ie "settlements
- of Sultan Rob", comes from, verbatim, Wilkinson's
- 25 report?

Page 158

- 16:39 1 By "his original village" you mean Mathiang, the
  - 2 site where he met Wilkinson?
  - 3 A. Yes.
  - 4 Q. You do accept, though, that there is evidence that
  - 5 Sultan Rob in fact lived in Burakol at least by 1904?
  - 6 A. I'm not sure, Mr President, if I'm allowed to say this,
  - but my own personal opinion is that he might well have
  - 8 been operating two villages, and moved back and forwards
  - 9 between them. That's how I interpret the various
  - 10 reports on his location during this period.
  - 11 Q. You qualified that as your own personal opinion. Is
  - there any evidence in the record that that was indeed
  - 13 the case?
  - 14 A. The evidence in the record is the difficulty in
  - 15 reconciling all of these reports without making that
  - 16 assumption.
  - 17 Q. You say in your report that Sultan Rob lived in Mathiang
  - up to his death in 1906, but you would accept that the
  - 19 evidence in the record does not support that conclusion?
  - 20 A. Can you give me a reference?
  - 21 Q. Sorry, paragraph [19] of your second report, I believe.
  - 22 A. In paragraph 19, Mr President, I explain that -- and
  - 23 again perhaps this is supposition -- but that
  - 24 Huntley-Walsh reported seeing him on 8th March, and
  - 25 I believe that was in his old village. He was, of

- 16:41 1 course, also buried very near to the site of his old
  - 2 village.
  - 3 Q. In your [second] report at paragraph 31 you say that:
  - 4 "The paramount chief's settlement in 1905 was at the
  - 5 site of his old village near present-day Mathiang, and
  - 6 that is about 30 kilometres southeast of the present
  - 7 location of Abyei."
  - 8 That's correct, isn't it?
  - 9 A. Which paragraph are you asking me to look at?
  - 10 Q. Sorry, I was asking you to look at paragraph 31.
  - 11 A. Yes. I've lost the question, I'm sorry. I clearly said
  - that Sultan Rob lived in Mathiang up to his death in
  - 13 1906.
  - 14 Q. Okay. That was the question, so you've confirmed --
  - 15 A. I base that on the Huntley-Walsh --
  - 16 Q. You've confirmed the point, that's fine.
  - 17 Could we please just -- and I'll try to do this very
  - 18 quickly -- look at the cartographic record for the
  - 19 location of the paramount chief of the Ngok Dinka for
  - the period from 1904 at least to 1925.
  - Now, in your second report you describe Burakol --
  - let me ask a first question. Do you accept that Burakol
  - 23 was described by Percival as the place where Sultan Rob
  - was living when he met with him?
  - 25 A. Yes, I do.

- 16:45 1 A. Yes.
  - 2 Q. The next map I'd like you to look at -- you referred to
  - 3 it in your presentation -- is the 1907 northern
  - 4 Bahr el Ghazal map. If we zoom in on this map, do you
  - 5 see Burakol again marked in the fork between the
  - 6 Nyamora, or the Yamoi it's called again, and the Kiir?
  - 7 A. Yes, I do.
  - 8 Q. Do you see written below that, "Sultan Rob's new
  - 9 village"?
  - 10 A. Yes.
  - 11 Q. I'd like to take you now to the Whittingham sketch map
  - of 1910. Have you seen this before. We'll zoom in on
    - the area, it might be more helpful.
  - 14 A. Yes, I have seen it.
  - 15 Q. Do you see Abyia at the bottom of the map?
  - 16 A. I do.
  - 17 Q. And do you see the "ferry" marked at Abyia, or do you
  - see the word "ferry" written below Abyia?
  - 19 A. I do.
  - 20 Q. Would that map suggest to you that the ferry is located
  - as having its crossing over the Nyamora or the
  - 22 Umm Biero?
  - 23 A. That map would suggest that there is a ferry three and
  - a half miles upriver from the Kiir junction across the
  - 25 Umm Biero.

## Page 163

- 16:44 1 Q. And in your second report you describe Burakol as "on
  - the west side of the Ragaba Umm Biero"?
  - 3 A. Yes, I do.
  - 4 Q. And you say "whereas Abyei Town is on the east side of
  - 5 the Ragaba"?
  - 6 A. That's correct.
  - 7 Q. I'd like to look at the cartographic record on that. If
  - 8 we start with Percival's sketch map itself, can you see
  - 9 on the enlargement Burakol?
  - 10 A. I can.
  - 11 Q. Is it located in the fork between the Nyamora or
  - 12 Umm Biero and the River Kiir?
  - 13 A. Yes. In the enlargement on screen, of course, it does
  - say Yamoi, but I accept what you say.
  - 15 Q. You accept that the Yamoi is in fact the Umm Biero or
  - the Nyamora, the Ngok name for it?
  - 17 A. Yes, I do.
  - 18 Q. Do you see a number of markings suggesting scattered
  - 19 settlements or houses in that area?
  - 20 A. I see a number of markings; I don't think I can say that
  - they would necessarily mark scattered settlements.
  - There's no legend to check that.
  - 23 Q. It is a sketch map, to be fair. Do you see Bongo?
  - 24 A. I do, yes.
  - 25 Q. And that's marked close to the river?

Page 162

- 16:46 1 Q. Thank you. The 1914 Ghabat el Arab map, if we zoom in
  - 2 here, do you see again the fork between the Nyamora and
  - 3 the Kiir?
  - 4 A. I do.
  - 5 Q. Do you see "Abyia" written as an area label across the
  - 6 Nyamora?
  - 7 A. Abyia? Yes.
  - 8 Q. Yes. And do you see the ferry a little bit above the
  - 9 word "Abyia"?
  - 10 A. I see a ferry".
  - 11 Q. And that ferry would suggest to you again that it
  - 12 crosses the Nyamora?
  - 13 A. It would suggest it crosses the Umm Biero, yes.
  - Q. If we look at the 1918 Nyamell map which was part of
     your presentation [earlier], can you see the Abyia again
  - in the zoom-in on that map?
  - 17 A. Yes, I can.
  - 18 Q. It says in full, "Abyei (Sultan Kwol)"; correct?
  - 19 A. Yes
  - 20 Q. Do you see an "RH" just above Abyei on that map?
  - 21 A. Yes.
  - 22 Q. Would you agree with me that that likely represents --
  - I can take you to the key, but can we agree that that
  - represents "rest house"?
  - 25 A. It does indeed.

16:48 1	Q.	So the final map is the 1925 Ghabat el Arab map; do you
---------	----	---

- 2 see that?
- 3 A. Yes, I do.
- 4 Q. Do you see Abyei on that map?
- 5 A. Yes, I do.
- 6 Q. Is it again described as "Abyei", this time,
- 7 "Chief Kwol"?
- 8 A. Yes.
- 9 Q. Mr MacDonald, I have one more topic and I will try to be
- 10 very quick with it. It's on the subject of boundaries
- 11 and I would like to take you to --
- 12 THE CHAIRMAN: It is perhaps a good opportunity for
- 13 breaking.
- 14 MS MILES: Okay.
- 15 THE CHAIRMAN: Should I recall, Mr MacDonald, that you are
- not allowed to have contact with counsels of the
- 17 Government during the break?
- 18 THE WITNESS: I understand. I'd be quite happy to stay
- 19 here if someone would bring me a drink.
- 20 (4.49 pm)
- 21 (A short break)
- 22 (5.14 pm)
- 23 MS MILES: Mr MacDonald, just a couple more questions
- 24 concerning boundaries.
- 25 In your conclusion at paragraph 76 of your final

- 17:16 1 position that the red lines represent provincial
  - boundaries in Sudan? Looking at the map as a whole?
  - 3 A. I think the red lines are primarily intended to show the
  - 4 chapters into which the compendium is divided, and
  - 5 I would need to look at the chapter list to see whether
  - 6 one could identify the boundaries in that way -- sorry,
  - 7 the provinces in that way.
  - 8 Q. Do you know how many provinces existed in Sudan in 1905?
  - 9 A. No, I don't.
  - 10 Q. Would you accept from me that there were eight
  - 11 first-class and four second-class provinces, so twelve
  - in total?
  - 13 A. I'm not sure if you're including Darfur, which of course
  - was a tributary state, but given that possibility,
  - 15 I will accept your list.
  - 16 Q. Okay. And one of those first-class provinces was
  - 17 Kasala?
  - 18 A. If you say so.
  - 19 Q. Can you see Kasala on the --
  - 20 A. Yes, I can. I've actually been there.
  - 21 Q. Right. And Kasala is in fact crossing two chapters in
  - the diagram of chapters?
  - 23 A. Yes, it is.
  - 24 Q. So I put it to you again: is it your position that the
  - red lines on this map as a whole represent the

## Page 167

# 17:14 1 report you say that:

- 2 "MENAS's claim [the claim being that no provincial
- 3 boundary existed in 1905] has not been proved on
- 4 cartographic grounds."
- 5 A. Yes.
- 6 Q. Now, do you accept that there's not a single Sudan
- 7 Government map in the record in these proceedings that
- 8 marks any provincial boundary between Kordofan and
- 9 Bahr el Ghazal prior to 1905?
- 10 A. I accept that there's no map, yes.
- 11~ Q. Okay. You refer at paragraph 3.11~ of your first report
- to the compendium index map at figure 7.
- 13 A. Yes.
- 14 Q. You say of this map:
- "... [this map] clearly showed a pre-1905 border."
- 16 It's at paragraph 3.11 of your first report. It's

- 18 A. Yes.
- 19 Q. And you have produced an extract of that map in your
- 20 report in order to illustrate that point?
- 21 A. Yes.
- 22 Q. If you turn to this map in the Sudan handbook, which is

  - 2 A. I would not suggest that as a whole these lines show the

  - 4 Q. What's the scale of this map, Mr MacDonald?
  - 5 A. I can't read it. Something inches to 192 miles. One
  - 5 in ...
  - 7 Q. It's 1:12,000,000; do you accept that? That's a small
  - 8 scale; correct?
  - 9 A. It is a small scale.
  - 10 Q. The small-scale diagram of chapters map was produced by
  - 11 the War Office; is that correct?
  - 12 A. Yes.
  - 13 Q. Okay. The other War Office map that we find in the
  - handbook is the one that we looked at earlier, the
  - folding-out map at the back of volume 1, and that's at
  - 16 a scale of 1:4,000,000; correct?
  - 17 A. Yes.
  - 18 Q. So that means it's three times the scale of the diagram
  - 19 of chapters map?
  - 20 A. Yes.
  - 21 Q. Finally, the Mardon map is mentioned very briefly at
  - 22 paragraph 3.12 of your first report, and you say this is
  - 23 also from what you call the compendium, the Sudan
  - 24 handbook?
  - 25 A. Yes.

I turn briefly to the Government of Sudan's position. We maintain that the area transferred from Bahr el Ghazal to Kordofan in 1905 lay along and to the south of the Bahr El Arab River. This position is based on four key elements, all of which are documented in the contemporaneous records, and all of which are mutually consistent and reinforcing.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	the Ngok Dinka tribe from one province to another "necessarily entailed the transfer of Ngok Dinka territory", it goes on to assert that it was:  " the transfer of the tribe that defined the territory that was transferred, not the transfer of the territory that defined the tribes that were transferred."  Now, as part of this argument the SPLM/A accuses the Government of being preoccupied with the relationship between the transfer effectuated by Condominium officials and the location of the Kordofan/Bahr el Ghazal provincial boundary, both before and after the transfer.  The SPLM/A's position is that the provincial boundary which, in the contemporaneous documents, is continuously referred to as the Bahr el Arab that that boundary was only a so-called "putative" boundary that was provisional, uncertain, indeterminate, because of the confusion that's said to have existed over the identity of the Bahr El Arab River.  Accordingly, the SPLM/A argues that the location of	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Moreover, the logical consequence of the SPLM/A's position is that areas south of the 10°35' north latitude must have been considered to have been part of Bahr el Ghazal province before the transfer, otherwise there would have been no need for a transfer of such areas to Kordofan.  As I shall show, that cannot possibly be correct.  None of the evidence on the record none of it even remotely suggests that prior to the transfer  Bahr el Ghazal province was considered by Condominium officials to extend up to the 10°35' north latitude, or even to the 10°22'30" latitude decided by the experts, or that the transfer concerned areas situated so far to the north. That is entirely consistent with Wingate's description of the transferred area. First, in its memorial the SPLM/A said, and I quote from paragraph 1114:  "It is clear that the Government of Sudan and SPLM/A were familiar with the Sudan Government's records regarding the 1905 decision to transfer Sultan Rob and the Ngok Dinka. The parties referred to the Government's reports during their negotiation of the Abyei Protocol."  Second, our opponents admonish the Government of Sudan not to rewrite or second-guess what the Anglo-Egyptian administrators said and what their decision was in 1905. Don't second-guess what the administrators did at the time, or said they did.  Third, the SPLM/A also in its written pleadings has argued that we shouldn't draw speculative inferences

Now, with that introduction let me turn to the first key issue on which the parties remain divided at this stage of the proceedings, and this concerns what the contemporaneous documents that refer to the transfer actually do say, and what their implications are for identifying the area of the nine Ngok Dinka chiefdoms transferred to Kordofan in 1905.  I noted a few minutes ago that there are four documents dating from the relevant period that specifically refer to the transfer, and they're the following. They're put on the screen now.  There's the March 1905 Sudan Intelligence Report, which is in tab 9 of your folders and in tab 38 of the	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	occasions, complained of raids made on them by southern Kordofan Arabs, and it has therefore been considered advisable to place them under the same governor as the Arabs of whose conduct they complain."  Now, the SPLM/A relies on this passage to argue that what was being transferred was a people in order to protect them, the Ngok Dinka under Sultan Rob and the Twic under Sheikh Rihan, not a specific area, and that the land occupied by these people and thus transferred extended all the way up to the 10°35' north parallel of latitude. There's nothing in this passage, Mr President and members of the Tribunal, that remotely supports such an expansionist interpretation or theory.  My colleague this morning put emphasis on the reference to people: this was a transfer of people. He referred to the second sentence:
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	contemporaneously proposed mention the transfer specifically in connection with the corresponding change to the provincial boundary. The transferred districts were south of that river.  Third, those districts were noted by Wingate to have "formerly" constituted a portion of the Bahr el Ghazal province, and that is consistent with the fact that the pre-transfer provincial boundary between Bahr el Ghazal and Kordofan had been recorded as the Bahr el Arab.  As a result of the transfer Wingate wrote that the districts of the two Sultans previously in Bahr el Ghazal, ie south of the Bahr el Arab, ie south of what had formerly been the provincial boundary, are now incorporated into Kordofan.  Now it may assist to compare the positions of the parties if I place on the screen a schematic diagram illustrating what Wingate said. It's also under tab 13 of your folders, but the tab 13 doesn't move and this one does, so I'll refer to the screen. I think it's instructive to compare what Wingate said with how the SPLM/A views the situation.  Here's the effect of Wingate's description. Prior

Now, once again, it's pretty evident that senior Government officials and Wingate was the most senior such official viewed the question of provincial boundaries as significant in connection with the transfer, not irrelevant, as our colleagues would have us believe.  Wingate introduced the relevant passage of his memorandum by first stating at page 23:  "It has been possible during the past year [ie during 1905] to make some important alterations in the provincial boundaries which have tended to a general improvement in administration, and a few changes will also take place from the beginning of the New Year."  He then listed after saying this at page 24 what he termed "the principal alterations already effected", ie effected during the year 1905. Four changes were listed, with the fourth one being the transfer with which we are concerned.  As to this, Wingate said the following it's	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	been part of Bahr el Ghazal but now were going to be incorporated into Kordofan, surely Wingate would have said so, and he did not. 20		20	issue was the interpretation of a Norwegian royal decree
21		21	of 1812 concerning the extent of Norway's territorial

2	original 1812 decree had provided for.	2 (6.25 pm)
3	I'd suggest that, if anything, Wingate's description	3 (The hearing adjourned until 9.30 am the following day)
4	is even more relevant than what happened in that case in	4
5	clarifying what Condominium officials considered had	5
6	been transferred from Bahr el Ghazal to Kordofan in	6
7	1905. His memorandum was not prepared years later; it	7
8	was written shortly after the transfer decision had been	8
9	taken. It was not simply a general summary of the	9
10	earlier transfer decision; it added clarifications about	10
11	the geographical location of the transferred areas.	11
12	In no way did Wingate purport to change the decision	12
13	that had previously been taken; his memorandum explained	13
14	that decision. Governor-General Wingate had no reason	14
15	to change the decision, it wasn't controversial,	15
16	although it was understandable that he would explain its	16
17	territorial ramifications to his superiors by means of	17
18	the annual report. Those superiors, whether in Cairo or	18
19	in London, never thereafter questioned his description	19
20	of what had happened.	20
21	Thus when the SPLM/A argues that Wingate's	21
22	description was merely geographic, not a delimitation of	22
23	a boundary, this tells only half of the story. Yes,	23
24	Wingate made a geographic description. But that	24
25	description is highly relevant: it tells us that the	25
23	description is highly felevant. It tens us that the	23
	Page 205	Page 207

Given the earlier references to the Bahr el Arab as the pre-transfer administrative boundary, Wingate's description thus did place a northern limit on the transferred area, the Bahr el Arab. We agree that his memorandum and his description did not purport to delimit the southern boundary of the transferred areas, but the southern boundaries are not in dispute between the parties.  The only genuine question that Wingate's memorandum could give rise to is: what river was he referring to when he wrote that, "The districts of Sultan Rob and Sultan Okwai, to the south of the Bahr el Arab, have been incorporated into Kordofan"? What river was he referring to when he mentioned the Bahr el Arab?  Mr President, members of the Tribunal, that leads me	INDEX PAGE Submissions by PROFESSOR PELLET

But with your permission, Mr President, that story is maybe best held over until tomorrow morning.  THE CHAIRMAN: I thank you very much, Mr Bundy. The
